5 June 2008

2.00pm Psychology – Sally Denham Vaughan

Aims

Who would benefit from seeing a clinical psychologist and psychotherapy?

Who should we advise them to see, and when?

What's the difference between clinical psychology/counseling and psychotherapy.

Who should we refer to whom? Psychology/cbt/gateway worker

2.45 Small group work

ST3 – Working as a locum

ST1 & 2 – Referrals

3.30 Tea

4.00 Edie 2

Aims:

To explore the rationale behind the early detection of psychosis and early intervention in psychosis.

What GPs need to look for when they have ten minute consultation with a patient.

Comments / Feedback

Very good

Helpful to know more about Psychosis and CBT

Great session by Sally Vaughan! Useful small group session about locums, could do more.

Psychology sessions useful but fly session would be beneficial with more detail on the different types of psychotherapy. EDIE 2 - really good.

All sessions very helpful and relevant.

Discussion re: learning very useful and practical. Thank you.

Very helpful. Specially EDIE 2 info.

Excellent session

Psychology – Good, would benefit on a whole session on CBT

Referral – Good

EDIE 2 – Variable – Probably would be good as part of a session on child/adolescent psychiatry.

Both presentations very useful

Useful to learn about access to CBT useful talk on locuming – Thanks and trail it.

Really good session

Really useful and very informative session. Good to talk about locums

Good to look at CBT and its uses. Good to hear about the EDIE trail and how to refer. Useful to be able to ask questions in the role play. Also helpful to think about appropriate alternatives.
