

## Worcester VTS - Evaluation Form

ST1 ST2  
ST3  
(please circle)

18 September 2008

### Aims: / Objectives:

Explore the future of General Practice from 3 perspectives:-

- Acute Trust
- Virgin
- Traditional GP

### Comments / Feedback

Very interesting view from 3 different perspectives. Great to be able to consider the future of General Practice. Good to split into small groups and think about how we would improve General Practice – working more locally and addressing needs.

Interesting insight into future of GP.

Excellent. Need more debates. Good to hear political debate of senior colleagues. Excellent external speaker. Thank you.

Acute Trust – A good general outlook into working of GP and their responsibilities and problems faced as a chief executive, which we do not have insight into.

Virgin healthcare– Good presentation, but not sure if I would like private companies to take part in NHS.

Traditional GP – Good presentation. Relevant aspects and voiced the GP's thoughts.

Acute Trust – Enlightening and understanding issues and problems.

Virgin healthcare– interesting and insightful.

Traditional GP – Fantastic speech.

Interesting session. Thought provoking and introspective.

Very interesting and informative but quite worrying!

Excellent. Good speakers. Nice to have mixed small groups.

Generally very useful. Interesting views of the different groups. Bit intimidating. Worried about future job prospects.

Excellent.

Very good.

We need more debate.

Interesting points raised. Eye opening.

Good debate. Useful to see trainers views.

Very informative afternoon. Useful to see other points of view.

Excellent speakers (although many agendas). Small groups were ok.

Really interesting. Thought provoking.

Useful - raised some interesting points. Virgin – not as imposing as expected. Very relevant to the course, raised a lot of the issues on trainees minds that have not been able to be voiced as yet.

Very illuminating and though provoking. Entirely appropriate and pertinent to the current working climate.

3 interesting talks. I do feel depressed as we have always tried to provide a high standard of healthcare with access to our patients. However, we do have only a certain number of hours in the day.

All very good speakers and interesting topic.

Generally excellent, thanks.

Very interesting if slightly depressing afternoon.
